Objective

Software Engineering student with hands-on experience in full-stack development (React, Node.js, Laravel) and applied AI systems. Seeking internship opportunities to build scalable web applications and intelligent solutions.

Education

Bachelor of Science in Software Engineering

University of Wah – Wah Engineering College

2023 – Present

Expected Graduation: 2027

Relevant Coursework: Software Construction, Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Software Design & Architecture, Web Development, Artificial Intelligence, Software Project Management, Parallel & Distributed Computing.

Technical Skills

Programming: C, C++, Python, PHP, JavaScript, TypeScript

Web: HTML, CSS, React.js,

Backend: Node.js, Express.js, Laravel

Databases: MySQL, PostgreSQL

Tools: Git, VS Code, XAMPP, LaTeX

Concepts: OOP, MVC, REST APIs, Data Structures

Professional Skills

- Analytical and problem-solving skills
- Team collaboration and leadership
- Research writing and technical documentation
- Agile software development practices
- Effective communication and presentation
- Time management and adaptability

Academic & Software Development Experience

Full Stack Developer – NexusHireConnect (Job Portal)

University of Wah

Feb 2026 – Present

- Designed and developed a role-based job portal using React, TypeScript, Node.js, and PostgreSQL
- Implemented AI-based job recommendation system for improved matching

- Developed dashboards, CV generator, and REST APIs with authentication

Full Stack Developer – ElectraSuite Voting System

University of Wah

Mar 2025 – May 2025

- Developed full-stack voting system using React, Laravel, and MySQL
- Implemented CNIC-based secure voting with real-time tracking
- Built admin panel for election management and analytics

Projects

University Management System

Technologies: Java, OOP, Java Swing, MySQL

- Developed a University Management System to manage students, faculty, courses, and enrollments using Java, OOP principles, and MySQL.

Course Management System

Technologies: PHP, MySQL

- Built system for student enrollment, course tracking, and record management

Publications

- **Muhammad Salman**, *Towards Transparent Bone Fracture Detection*, presented at the 22nd IBCAST 2025, Murree, Pakistan.
- **Muhammad Salman**, *Deep Transfer Learning with Hybrid CNN Fusion for Smart Tomato Leaf Disease Diagnosis*, accepted for presentation and publication at ICCoR 2026.

Certifications

- The Art of Web Craft: Mastering WordPress – 2024
- Git and GitHub for Beginners – Coursera (2024)
- CACIO-2024 Joint Event Participant – 2024

Languages

English (Fluent), Urdu (Native), Pashto (Native)

Interests

Game Development, Web Technologies, Problem Solving, Exploring New Tools, Tech Blogging, Group Discussions, Outdoor Activities
